

# Ensure regulation compliance with **offsite cloud video storage.**

Powered by **.videoloft**

- All video backed up in a secure offsite cloud
- View live feeds & recorded video events from anywhere and at any time
- Receive instant notifications when motion is detected
- Compatible with a wide range of professional security cameras
- Intelligent video analytics

# Videoloft features.

## Secure offsite backup.

Ensure your footage is always there when you need it. Videoloft offers flexible cloud storage plans ranging from 7 days to 3+ years, and all your video is encrypted & securely stored in the Videoloft cloud so it's safe, even if the recorder or cameras malfunction, are stolen or damaged.

## Motion triggered & 24/7 recording options.

You may be required to store all video offsite. With Videoloft you can select which cameras need to be recording 24/7 to the cloud. With cost effective plans and onboard storage to buffer in case of network struggles, Videoloft is a reliable & affordable solution.

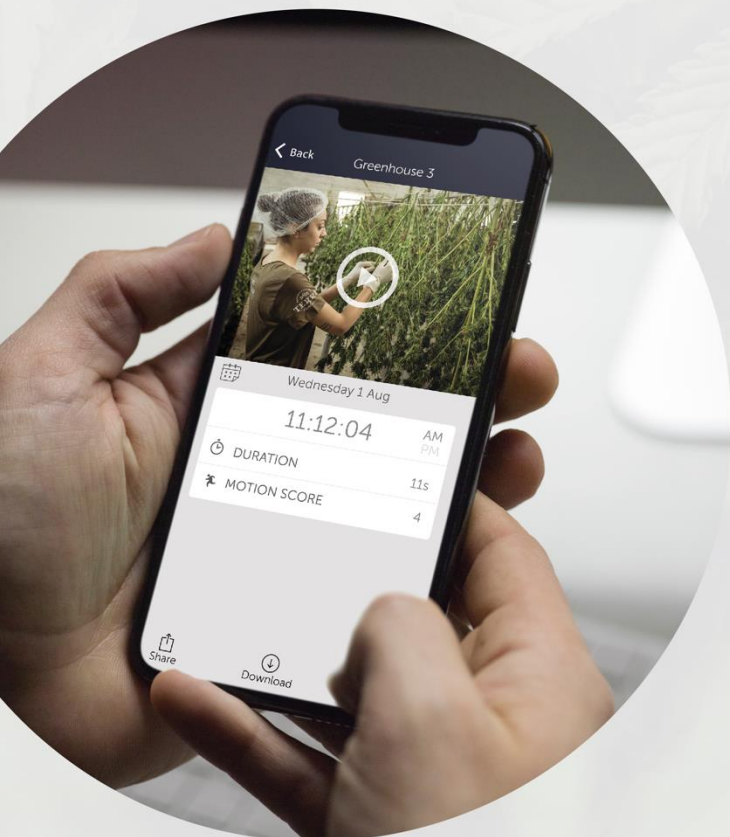

## Bulk download tool.

Regulators can request access to review days worth of stored video at short notice. With the Videoloft bulk download tool you can simply enter the date range to access a zip file link you can easily share with officials.

## Configurable FPS.

FPS and resolution requirements can vary from state to state. With Videoloft cloud recording up to 1080p and the option to increase from 10fps to 15fps, you can ensure the video quality meets the state specifications.
